Algebra Lessons As a math teacher, I understand that a lot of students struggle with algebra. With that in mind, I separated the different algebra lessons or skills into three (3) categories: introductory algebra, intermediate algebra, and advanced algebra. In fact, in math, I am convinced that more students seek help in algebra than any [...]

A logarithmic spiral, equiangular spiral or growth spiral is a self-similar spiral curve which often appears in nature. The logarithmic spiral was first described by Descartes and later extensively investigated by Jacob Bernoulli, who called it Spira mirabilis, "the marvelous spiral".

Logarithmic spiral - Wikipedia

Definition of a Fraction. You might recall that in math a number is a point on the number line. Well, there is a special collection of numbers called fractions, which are usually denoted by a/b , where "a" and "b" are whole numbers and "b" is not equal to "0".. It may be helpful to get your homework off to a great start by defining what fractions are, that is to say, specifying ...
