

Mineral Exploration In Antarctica

Mineral Exploration In Antarctica

The history of Antarctica emerges from early Western theories of a vast continent, known as Terra Australis, believed to exist in the far south of the globe. The term Antarctic, referring to the opposite of the Arctic Circle, was coined by Marinus of Tyre in the 2nd century AD. The rounding of the Cape of Good Hope and Cape Horn in the 15th and 16th centuries proved that Terra Australis ...

History of Antarctica - Wikipedia

A mineral is, broadly speaking, a solid chemical compound that occurs naturally in pure form. A rock may consist of a single mineral, or may be an aggregate of two or more different minerals, spatially segregated into distinct phases. Compounds that occur only in living beings are usually excluded, but some minerals are often biogenic (such as calcite) and/or are organic compounds in the sense ...

Mineral - Wikipedia

There are deposits of minerals such as coal and iron ore in Antarctica, but there are vast economic and technical difficulties associated with the recovery of mineral deposits.

Antarctica - IGY and the Antarctic Treaty: The importance of coordinating polar science efforts was recognized in 1879 by the International Polar Commission meeting in Hamburg, Germany, and thus the 11 participating nations organized the First International Polar Year of 1882-83. Most work was planned for the better-known Arctic, and, of the four geomagnetic and meteorologic stations ...

Antarctica - Physical geography: The geologic evolution of Antarctica has followed a course similar to that of the other southern continents. The earliest chapters in Antarctica's rather fragmentary record extend far back, perhaps as much as 3 billion years, into early Precambrian time. Similarity in patterns of crustal and biological evolution in the southern continents can be traced back ...

Introduction It has been only 100 years since humans first occupied the continent of Antarctica (1899), and a mere 180 years since seafarers first saw the islands of the Antarctic Peninsula (1819).

Antarctic History

European exploration of Africa began with the Greeks and Romans, who explored and settled in North Africa. Fifteenth century Portugal, especially under Henry the Navigator, probed along the West African coast. Scientific curiosity and Christian missionary spirit soon were subordinated to mercantile considerations, including lucrative trafficking in enslaved persons.
