Zoonoses: Infectious Diseases Transmissible Between ...

Zoonotic Diseases (also known as zoonoses) are caused by infections that are shared between animals and people. Every year, tens of thousands of Americans will get sick from diseases spread between animals and people. These are known as zoonotic diseases. Zoonotic means infectious diseases that are spread between animals and people.

Zoonotic Diseases | One Health | CDC

Classic infectious diseases such as rabies, plague, and yellow fever have not been eradicated despite major efforts. New zoonotic diseases are appearing due to global conditions such as overpopulation, wars, and food scarcity, which facilitate human contact with rodents, stray animals, and their parasites.

Zoonoses: Infectious Diseases Transmissible Between ...

Zoonoses are infectious diseases transmissible from animals to humans. They may be caused by bacteria, fungi, parasites, viruses and prions. As many as 60% of all communicable diseases and 75% of emerging infectious diseases in humans are caused by microorganisms that have an animal (most often wildlife) reservoir.

Immunoserological Diagnosis of Zoonoses and Emerging ...

Zoonoses are a persistent threat to the global human health . Today, more than 200 diseases occurring in humans and animals are known to be mutually transmitted. Classical infectious diseases, such as rabies, plague, and yellow fever, have not been eradicated despite major efforts.

Zoonoses : infectious diseases transmissible between ...

Zoonosis. Zoonoses can be caused by a range of disease pathogens such as viruses, bacteria, fungi and parasites; of 1,415 pathogens known to infect humans, 61% were zoonotic. Most human

diseases originated in other animals; however, only diseases that routinely involve non-human animal to human transmission, like rabies, are considered direct zoonosis.
